

# Ecwid E-Commerce

Sell your products online today

Ecwid is a full-featured, cloud-based e-commerce platform that allows SMBs to create professional online stores and embed them into any web presence in minutes, and operate multiple online stores with mobile point-of-sale integration simultaneously. Ecwid has over 800,000 registered merchants in 175 countries, and is available in 45 languages.

Ecwid gives businesses a simple, fast, and effective way to begin selling online. Giving businesses the ability to use Ecwid will deliver a transparent and quick ROI, help you retain these clients, and dramatically increase their lifetime value.

## KEY ADVANTAGES

Ecwid is a powerful online store which will allow merchants to begin selling their products online today. With Ecwid, businesses will keep their investment in their existing web presence and quickly add an online store, providing their customers with an intuitive, simple and secure online shopping experience. This store can also easily be added to a Facebook page, marketplaces, or any other website. If a merchant is looking to sell their products or services online, Ecwid helps by providing a fast, powerful and reliable e-commerce platform that can be set up in minutes. Ecwid is a true software-as-a-service product, meaning any upgrades to the core platform automatically are adopted into merchant environments. Industry trends are quickly implemented by Ecwid and the end users of the platform immediately realize the benefits.
